

North West Highlands  
**GEOPARK**  
Iar-Thuath na Gàidhealtachd

# Geotours 2014

## Explore the “Cradle of Geology”

Expert tuition by Geopark staff will help you to interpret the geology of this wild and remote highland landscape. The area has the lowest population density in Europe and exhibits unique geodiversity and biodiversity. As home of the oldest rocks in Europe, the first identified thrust fault and with evidence of the earliest life; the North West Highlands Geopark truly earns its title the “Cradle of Geology”.

### Trilobite Hunt

Meteorite Strike - Assess the evidence

Follow the Footsteps of the  
Great Victorian  
Geologists.
