

GEOLOGICAL SOCIETY OF GLASGOW COOKIE POLICY

A cookie is a text file that is placed on your hard disk by a web page server. Cookies cannot be used to run programs or deliver viruses to your computer. Cookies are uniquely assigned to you and can only be read by a web server in the domain that issued the cookie to you.

One of the primary purposes of cookies is to provide a convenience feature to save you time. The purpose of a cookie is to tell the web server that you have returned to a specific page. For example, if you personalise a website's pages, or register with a website, a cookie helps that website to recall your specific information on subsequent visits. This simplifies the process of recording your personal information.

You have the ability to accept or decline cookies. Most web browsers automatically accept cookies, but you can usually modify your browser setting to decline cookies if you prefer. If you choose to decline cookies, you may not be able to fully experience the interactive features of the Website.

By using this website, you accept the terms of this Cookie Policy and you consent to this website placing cookies on your computer.

The cookies we use are very benign. The only cookies we use are:

- **Session Cookie:** This one stores any viewing preferences or login information (in case you've logged in for any reason)
- **Google Analytics:** Google Analytics helps us to see how many people visited our website, where they came from and how they interacted with the website

If you block use of cookies on this website, you might not enjoy its full impact.
