

Dear Members

A reminder that our next lecture will be on **Thursday 9th February 2023 at 7:30pm** in Lecture Theatre A407 of the Boyd Orr Building. This will be an 'in-person' lecture, and will be recorded but not live zoomed to the membership.

However, we are looking for a couple of 'sound checkers' to zoom in to check the sound for the recording (at about 7:15) - and then stay online throughout the talk and use the chat function (which one of us will actively monitor) to tell us if there's any sound/video problems. So if you want to do this please contact me or Ian Miller ([meetings@gsocg.org](mailto:meetings@gsocg.org)) to get the zoom details.

The lecture will be given by Dr Maarten Krabbendam, of the British Geological Survey on "A new stratigraphic framework for the early Neoproterozoic successions of Scotland (Moine Supergroup no more)"

This talk forms the basis of the new chapter in the revised (5th Edition) of the Geology of Scotland book - due out later this year.
